

# A DAY IN THE LIFE: MEET JANICE

## VIDEO TRANSCRIPT

Hi everyone, I'm Janice. I'm a Technology Consultant and I work for Accenture Technology Advisory in London. The three things that I really love about my job:

1: The variety of opportunities that comes through our pipeline is so huge that really there's a chance to work in other areas like cloud, AI and even blockchain.

2: I get to work with people from all across the Accenture functions and all over the world.

3: We get lots of amazing opportunities to go on very exciting training like the Design Thinking Academy.

"So we've just finished a 3-day Design Thinking Academy course so Lucy what do you think about it?"

"Yeah it was really good fun actually. Learnt a lot and met some really great people along the way and I can't wait to put all into practice now."

And we've used lots of Post-Its, as you can see.

Outside of work, you'll usually find me cooking at home or working at the gym because really my passions outside of work are around nutrition and fitness.

Working at Accenture actually has opened up a very big community of like-minded people. I've been to wellness festivals with friends that I've met from work. I actually lead the Health and Well-being team for Tech Advisory.

The great thing about working at Accenture is that I literally have hundred of thousands of other brains to pick on and we've also got so many amazing technology assets such as the Docks up in Dublin and all of these other wonderful parts of the company.

I find that people at Accenture generally have an amazing sense of humor and we know how to not take ourselves too seriously. If you want to join a place where we work hard and play hard, check out the careers website.
